EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Deborah Corpus on 9/11/2008.

The application has been amended as follows:

Replace the Abstract with the following paragraph:

Disclosed in the present invention is a creation production support method, for enabling the easy production of a large amount of creative material, within a short period of time, while reducing the labor effort required of a creator, and an apparatus and a storage medium therefor. Specifically, creative element data for a pair composed of a creative element and an element index are stored in a database (4), and the element index is extracted from the database (4) and is placed in a reactor (9). From this, a set of correlated element indexes is obtained, and creative elements corresponding to element indexes that constitute this set are coupled together and output. Then, a creation is automatically generated, and 5WIH information, indicating the contents of a corresponding creative element, and sensory information received from the creative element are written in the element index. When based on this information a correlation is obtained, a creation can be provided that can not be formed merely by the random linking of creative elements.

In the Claims:

Claims 6 and 7 (Cancelled by the Examiner)

Claims 13 and 14 (Cancelled by the Examiner)

Claim 15 (Amended by the Examiner) A creation production support apparatus according to one of claims 8 to 12 [[14]], wherein said database is provided in an external storage device for a stand-alone computer.

Claim 16 (Amended by the Examiner) A creation production support apparatus according to one of claims 8 to 12 [[14]], wherein said database is provided for a server connected to a LAN, and said extraction means, said calculation means and said output means are provided for a client connected to said LAN.

Claim 17 (Amended by the Examiner) A creation production support apparatus according to one of claims 8 to 12 [[14]], wherein said database is provided for a server, and said extraction means, said calculation means and said output means are provided for a terminal device connected to said server via the Internet.

Conclusion
